## WEHOLITE MANHOLES FROM PLASCO LTD

The Weholite system provides solutions for all sewerage and storm water systems, including Sewerage Manholes, Valve chambers, Inspection chambers etc. Manholes are normally prefabricated. Pipe connections can be manufactured to suit any standard sewer or storm water pipe. The inclinations and angles of the connections can be set as required. Standard manhole covers will be selected according to application or traffic loads. If required, ladders can be fitted inside the manhole. Available up to 2200mm diameter & any specified depth.

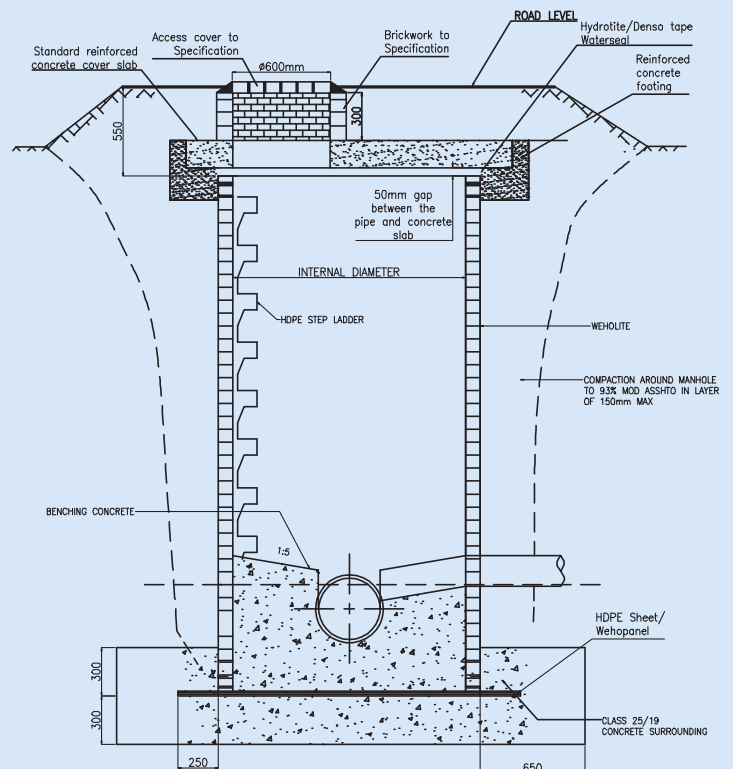

Manholes for high water table are designed accordingly. Reinforced concrete base to be designed to counter buoyancy and to anchor HDPE puddle on the manhole.

### Applications include:

- Sewer Manholes
- Valve Chambers
- Inspection Chambers

## FEATURES & BENEFITS

- Significantly Reduced installation time
- Tough, impact-resistant
- Lightweight, easy to install
- Long service life (>100 years)
- Tested for resistance to root ingress
- Chemically resistant, no corrosion
- Excellent flow, smooth inner and outer wall
- Variety of options and configurations
- Tested prior to delivery for water tightness
- Welded HDPE pipe connections are root ingress resistant

*Designed and built for  
the next generation*
