Weholite can be used to manufacture retention & attenuation tanks for storage of drinking water and storm water management with a wide range of capacities according to the specific needs of the customer. The tanks are available in inner diameters ranging from 1000mm to 2200mm depending on specific ground conditions and project requirements.

Applications:

The tanks of Weholite system are used for storing and retention of:

- ▶ Storm water, sanitary and municipal sewage
- ▶ Potable water and reservoir for fire fighting systems
- ▶ Liquids produced by agri-food industry, aggressive industrial sewage, liquids used in biogas plants
- ▶ Other liquids (containing chemical compounds to which PEHD is chemically resistant)

Advantages of Weholite Tank Systems:

- ▶ Lightweight
- ▶ Easy handling
- ▶ Tolerant to ground movement
- ▶ Superior hydraulic design & properties
- ▶ Good chemical & abrasion resistance
- ▶ Quicker installation
- ▶ 100% water tight joints
- ▶ Customized tanks to suit multiple needs
